Cobblestone Energy
Human Resource Professional
Dubai

09th September 2021

Dear Sir/Madam,

RE: APPLICATION FOR JUNIOR DEVELOPER POSITION

Juliet is an enthusiastic entry-level software developer. Going through your job description I got inspired by how Cobblestone Energy embraces technology and risk management and am excited to submit my application for a junior developer role at your company.

One of the mantras I live by is life-long learning a proof that there is no end to learning and currently am taking an AWS course where am learning a variety of AWS core services. With my creative and analytical nature to identify, analyze problems and generate meaningful solutions, something that I have been able to incorporate in my personal projects, I believe I will continue to deliver high-quality work for the continued success of Cobblestone Energy.

I am excited to bring my coursework skills in Python, Django, Kotlin, Java and databases, alive by doing hands-on work in projects that solve human needs. Currently am working on a school management system that allows student and the staff to enroll to the program and help the administration to monitor daily activities of the school.

Please find attached my resume. Feel free to contact me should you require anything further clarification.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Juliet Gisemba
